

Agronomic Consulting

Our consulting services are centered on our clients, and their success is at our core. We invest in our team of consultants to ensure our clients receive the best possible expertise and service. At VAS, we care about stewardship and the land - so you can keep farming for generations to come. We are VAS, and we are your trusted agronomic consulting partner.

"The biggest thing I like, is finding out how much we saved on fertilizer. I don't know if many farmers really value manure as they should. We use very little commercial fertilizer now and it has saved us a lot of money. Having a nutrient management plan with VAS gives me peace of mind with regulators and neighbors."

- Steve Carpenter
Dairy and Crop Farmer
Darlington, Wis.

INDEPENDENT

We have one goal – to provide independent, knowledgeable, on-farm consultants and services, maximizing economic benefits for producers and growers.

LOCAL

VAS Laboratories' experienced agronomic consultants are located throughout WI, Northern IL, and Southeastern MN, meaning your consultant knows and understands the soil characteristics and local region you farm in.

DEDICATED

Our certified, independent agronomic consultants, and skilled laboratory technicians take the time to listen to your unique needs – creating interactive plans and solutions that work for you and your operation.
